KEEP UP THE momentum

Learn, Grow and Explore

At Special Tree, we know that learning doesn't stop just because school is out. The Discover! Summer program helps bridge the gap to keep rehabilitation moving forward in a fun, safe environment. Students enjoy educational community outings, therapeutic activities, and dynamic group sessions that foster positive social interactions and increased self-reliance.

Paid Jobs for Teens

How about earning a paycheck? Students ages 14 and older may participate in part-time paid work opportunities during the 10 week program. Daily feedback from staff helps students learn the attitudes, skills and behaviors needed to get and keep a job.

Make Friends and Build Skills

Helping students build relationships with others is a key component of the Discover! Summer program. Kids learn social skills to help them interact, and strategies for dealing with their moods and feelings. Special Tree's proven approach to behavior is aimed at providing meaningful alternatives to situations and on reinforcing the positive. Success here is critical to overall rehabilitation success.

Back to School Success

Learning and academics are woven throughout the schedule so students are ready for a successful transition back to school in the fall. And for those who need a little more support, we offer transitional education services, academic testing, and tutoring to enhance existing academic skills.

HERE'S THE scoop
