

Discover! After School programming helps kids and teens succeed in all areas of their life— as a **student** at school, as a **family member** at home, with **friends**, and in their **community**.

discover! after school

Special Tree offers an array of services created specifically to serve the needs of children and teens with brain injuries. The programs focus on self-awareness, community exploration and peer relationships. All of Special Tree's Children's Services are directed by a leading area pediatric physiatrist, and an interdisciplinary rehabilitation team works with every student and their family to foster improved functional skills and increased independence. Cost effective and customized to each participant's individual goals, our comprehensive programs include:

- Discover! Summer Rehabilitation Program (June-August)
- Discover! After-School Programming (September-May)
- Outpatient Services and Academic Support
- Transitional Education Services
- Pre-vocation Skills & Job Readiness
- Subacute Care and Rehabilitation at our NeuroCare Campus

An Exceptional Therapy Program
for Kids & Teens with Brain Injuries

SKILLS for life

Special Tree's **Skills for Life** curriculum helps students learn strategies for success.

The Discover! After School Program focuses on academic support, peer interaction, personal development, and helping students develop skills to navigate their daily routines. Students participate in one-to-one tutoring, group activities, community outings and traditional therapies. Each student's rehabilitation program is customized according to their strengths, needs, and preferences. The Skills for Life philosophy is woven throughout each student's program to help them succeed in all areas of their life—as a student at school, as a family member at home, with friends, and in their community.

Participants build skills which empower them in all areas of their lives:

As a Student

- Good Study Habits
- Organizational Skills
- Classroom Accountability
- Attention & Concentration
- Academic Support & Tutoring

As a Family Member

- Functional Independence
- Problem Solving
- Personal Responsibility
- Sibling Interaction
- Positive Behavior

As a Friend

- Making and Keeping Friends
- Self Esteem and Awareness
- Making Good Choices
- Coping Skills & Peer Pressure
- Diversity and Cultural Awareness

As a Citizen

- Navigating the Community
- Accessibility & Overcoming Barriers
- Pre-vocation Skills & Job Readiness
- Accessing Resources
- Living with Disability

Program Details

Discover! After School Programming runs from September through May, weekdays from 4:00 to 6:00 p.m. based from the Troy Neuro Skills Center and the Livonia Student Center.

Outpatient Services and Academic Support

Individual therapies can be coordinated as a complement to the After School program or as stand alone treatment. Students may also participate in one-to-one academic tutoring.

Transitional Education Services

Comprehensive transition planning and neuroeducation consulting is available through Transitional Education Services, which provide a critical link between students, families, schools, and rehabilitation professionals.

Registration
